TECHNICAL SKILLS

Languages: JavaScript (ES6+), Go, Python, C++, SQL, HTML, CSS
Web Development: React, Redux, Next.js, Node.js, Express.js, Tailwind CSS, REST APIs, PWA
Platforms & Data: One App, One Data, YAML business rules, MySQL, MongoDB
Developer Tools: Git, Docker, Jenkins, Webpack, npm, Linux, Mountebank
Cloud & AI: Google Cloud (GCP), Vertex AI, Gemini, Google ADK, Ollama, GitHub Copilot

WORK EXPERIENCE

American Express
 Apprentice | Global Loyalty & Benefits (GLB)

Jan 2026 - Present
 Bengaluru, India

- Built an Event Tracker using One App (React) and One Data (JavaScript) to trace rewards events across APIs and display readable records, event flows and errors.
- Implemented YAML business rules and partner configurations for Hilton Canada co-brand rewards on R42, covering enrolment, verification and cycle-cut points transfers.
- Implemented forfeiture, reinstatement and bonus fulfilment flows for the Canada co-brand initiative.
- Delivered fraud-related cancellation behaviour and provided extended support for supplementary-card journeys.
- Performed root-cause analysis and event and profile remediation across Global Network Services (GNS) and GLB Rewards v2; resolved processing and data issues and supported issuer onboarding.
- Authored R42 platform and debugging guides to support team knowledge sharing.
- Presented a JARVIS hackathon prototype extending the Event Tracker with AI-assisted root-cause guidance and domain Q&A, powered by GitHub Copilot in local VS Code.

Qugates
 Intern & Probationary Junior Developer

Feb 2025 - Nov 2025
 Bengaluru, India

- Unified inventory, payroll and voucher workflows into a single data-entry process and automated salary-slip generation.
- Built an invoice-extraction pipeline using Ollama and server-side scripts to extract invoice data and populate vouchers.
- Implemented snapshot tables and year-based MySQL partitioning for financial reporting and record retrieval.

PROJECTS

Voice-Controlled Application | MERN Stack | [Live Demo](#)

- Implemented voice commands, JWT-based access control and PWA features; worked on web and API performance optimization.

AI-Based Teacher Companion | React, Python, GCP, Gemini | [Live Demo](#)

- Built teacher peer matching and lesson sharing; orchestrated Google ADK and Vertex AI/Gemini agents for localized content and visual aids, validated in simulated multi-grade classrooms.

CERTIFICATIONS

Gen AI Academy | Hack2Skill

May 2025

Meta Front-End Developer | Coursera

Aug 2023

Google IT Automation with Python Specialization | Coursera

Jan 2022

EDUCATION

Mangalore University
 Bachelor of Vocation in Software and Application Development

2021 - 2024
